

Ordermanagementsystem via Spedion-APP

All transport orders for Hergarten fleet will processed ex TMS WinSped to our telematics tablets and the Spedion mobile app. The concerned tablet and herewith the assigned truck and driver receives the order and can process it on the tablet.

Within the delivery process we differentiate four statuses:

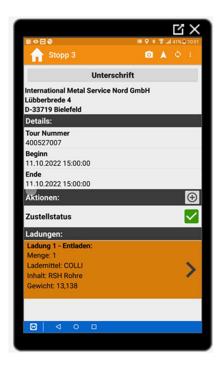

- Clear reciept
- Missing parts
- Refused delivery
- Undeliverable

Example screenshot:

Use case: Clear receipt

Each delivery needs to be signed by consignee or recipient otherwise the POD document cannot be created within the TMS!!!!

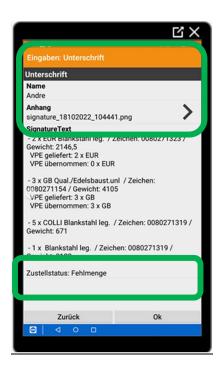

Example POD in WinSped:

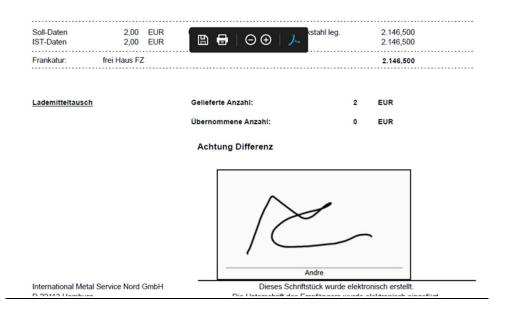

Use case: Missing parts

Example POD in WinSped:

Use case: Refused delivery

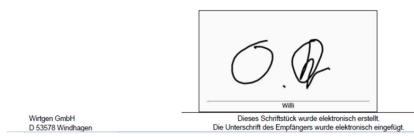

Example POD in WinSped:

Übernommene Anzahl:
Warenannahme wurde verweigert

In case you face any problems with your tablet or the Spedion application do not hesitate to contact our service desk via:
